## We Believe in Texas Public Schools

### Albums

ESC 2 Region Schools joined other schools today to call on legislators to oppose the A-F Accountability System along with School Vouchers that would take public school funds. Again, the purpose of today's trip was to advocate for public schools and to share the benefits of attending them. Issues such as school choice/vouchers, funding, and the A-F Evaluation System are certainly hot topics in this legislative session that we rallied at the capitol over and discussed /made office visits to the Senate and House Education Committee members along with our local representatives. We wanted to show that we believe in what we do.

We were a united group who supports Public Education as we wore our bright red shirts stating our Belief in Texas Public Schools as well as what we were advocating for and against. There are many other photos within this album of those other students and superintendents who were at the rally on March 15 during Spring Break in Austin, Texas.
