CONSTELLATION CHICKEN

A constellation is a group of visible stars that form a pattern or picture in the sky. The pattern they form may take the shape of an animal, a mythological creature, a man, a woman, or an inanimate object. Astronomers recognize 88 different constellations. The smallest constellation is the Southern Cross, Crux, and the largest constellation is the Water Snake, Hydra.

DID YOU KNOW?

National School Lunch Week is this month! Look for proteins like chicken in your school cafeteria and try new foods from Texas farms and ranches! Milk, lean meat, fruit, vegetables, and whole grains can all be part of a healthy school lunch – and they're all produced right here in Texas.

Chicken is an excellent source of protein. Protein is important because it builds muscles and helps keep your body strong. Chicken is also low in fat, making it a healthy choice for any meal.

FIND THE DIFFERENCE

One of the chickens is not like the other. Circle the one you think it could be.
